não há mais como negar a importância e a imbricação entre ética e meio ambiente ou entre ética e ecologia nesse sentido a obra pretende contribuir para
 suprir um déficit teórico relativamente ao mapeamento crítico das principais correntes ideológicas políticas e filosóficas que procuram responder à pergunta
 central lançada no título qual o valor da natureza possuiria a natureza valor meramente instrumental para os seres humanos ou teria ela valor próprio
 intrínseco em que constitui cada um desses valores e quais são as consequências derivadas de sua aceitação e adoção podemos falar em direitos da natureza
 ou direito dos animais essas perguntas formarão a taxonomia do debate moral relativo ao valor da natureza e deverão influenciar novas compreensões e
 novos olhares sobre o lugar que ocupamos no mundo e sobre o que estamos autorizados ou não a fazer com a natureza afinal tudo o que é humano é
 ecológico e tudo o que é ecológico é humano
