a multidisciplinary examination of the interplay between social capital the value derived from social ties and information technology the concept of social capital or the value that can be derived from social ties created by goodwill mutual support shared language common beliefs and a sense of mutual obligation has been applied to a number of fields from sociology to management it is only lately however that researchers in information technology and knowledge management have begun to explore the idea of social capital in relation to their fields this collection of thirteen essays by computer scientists sociologists communication specialists economists and others presents a multidisciplinary look at this particular intersection of information technology and social science and the need to adopt a sociotechnical perspective for the most part the contributors take a positive view of the interplay of social capital knowledge sharing and community building some essays look at specific instances including the on line and face to face relationships of a community of athletes the building of social capital among iranian ngos and the internet based communities created by the open source movement while others discuss more general ideas of civic and personal communities the last four essays examine computer applications that augment social capital including topic and member centered communications spaces such as the expert finder and the loops system and virtual repositories of knowledge such as the answer garden and pearls of wisdom

quiet defiance the rhetoric of silent protest focuses on the rhetorical dimensions and power of silent protest bridging the gap between the study of protest and the study of rhetorical silence strategic silence meant to communicate to and influence an audience this book is the first of its kind to concentrate solely on the phenomenon and tradition of silent protest the contributors to this volume hail from different cultures disciplines and fields they examine past and present day cases of silent protest with different research questions and paradigmatic perspectives in mind and methodological approaches at hand collectively however their original chapters offer a rich multifaceted understanding of the potentialities limits nature effects risks and rewards of silent acts of protest individual or otherwise against oppressive unjust regimes and systems of power

a surprising window into the online lives of people sixty and over offering essential insights no matter your age many popular accounts say the older you are the greater your tech struggles and it s worrying to think of loved ones emailing cringe worthy misinformation falling for phishing attacks or becoming lonelier with increasing time spent online but in their eye opening book on the internet s fastest growing demographic researchers eszter hargittai and john palfrey offer a more nuanced picture

debunking common myths about older adults internet use to offer hope and a necessary call to action incorporating original interviews and survey results from thousands of people sixty and over wired wisdom shows that many in fact use technology in ways that put younger peers to shame over sixties are often nimble online and quicker to abandon social media platforms that don't meet their needs despite being targeted more often they also may be less likely to fall for scams than younger peers and fake news actually fools fewer people over sixty who have far more experience evaluating sources and detecting propaganda still there are unseen risks and missed opportunities for this group hargittai and palfrey offer practical advice and show that our stereotypes can be hurdles that keep us from building intergenerational support communities helping loved ones adopt new technology that may improve their lives and thriving together online

social networks are ubiquitous the science of networks has shaped how researchers and society understand the spread of disease the precursors of loneliness the rise of protest movements the causes of social inequality the influence of social media and much more egocentric analysis conceives of each individual or ego as embedded in a personal network of alters a community partially of their creation and nearly unique to them whose composition and structure have consequences this volume is dedicated to understanding the history present and future of egocentric social network analysis the text brings together the most important classic articles foundational to the field with new perspectives to form a comprehensive volume ideal for courses in network analysis the collection examines where the field of egocentric research has been what it has uncovered and where it is headed
